

Worcester Institute for Senior Education

Learning and Technology

Laptops, tablets, and smart phones are giving us unprecedented access to the world of ideas. Nowhere is this more evident than in the classroom. Online classes, digital research and publishing, video conferencing, and ubiquitous connectivity have transformed education for students of all ages. We'll see how technology is changing the ways we teach and learn and discuss how well these changes are preparing us for further education, work, and life after work.

Class Outline

Copies of the class presentations, along with links to resources discussed in class, are available at <http://queenlake.com/wise/lt14c/>.

Class	Theme
2/7	If we knew where we were going, we'd be there already.
2/14	A conversation with Prof. James Lang on Lifelong Learning
2/21	Reading, 'riting, and 'rithmetic, redux
2/28	The changing world of work
3/7	What's next?

Each class will include a review of the week's educational technology news, a discussion on a theme, and a demonstration of various programs, apps, and gadgets.

We will also have guest speakers. As a result, we may change the order and content of the class themes.

In addition, as we all know, New England weather may have other plans for our time. Be sure to check the WISE weather hotline – 508-767-7225 – if the weather looks dodgy.

Study Group

Join us each Monday from 11:30 to 1:00 at Charlie's in Hagan Campus Center on the Assumption campus. We'll talk about your questions, computer problems, and related ideas.
