

Communication

- ▶ What do you want to learn?
- ▶ From whom can you learn it?
- ▶ What do you have to say?
- ▶ To whom do you want to say it?

SOCIAL MEDIA

Communication

Pedagogy trumps
technology every time.

“

all students understand how to use technology as a tool to engage in creative, productive, lifelong learning rather than simply consuming passive content.”

U.S. Department of Education's 2016 National Education Technology Plan

Creators not consumers

- ▶ Drilling quiz programs
- ▶ Passively watching videos
- ▶ Teacher created content via PowerPoint or other
- ▶ Testing
- ▶ Student research using different online sources
- ▶ Student create content (video, presentations, 3D printing)
- ▶ Student-designed assessment

substitution, augmentation, modification,
redefinition

Not just about technology

It's about practice!

Digital divide

Not just about
the device...it's
about the
pipeline!

Supporting digital literacy

- Educate yourself: in general, on what's happening in your district, on what's happening in the classroom.
- What DO they have, what DO they need?
- ...and how much of this is money?
- Not just about technology: about professional practice
- Is this an embedded part of district goals and priorities?

What else?
